Subject: Chris Recommendation

It is my pleasure to recommend Chris Lyons for the position of software developer. I worked with Chris as his business analyst and project lead at the US Postal Service.

Chris has lead development efforts on many critical USPS.com applications. Chris is often brought in to redesign and refactor software and always completes his tasks in a timely manner. He is also part of the team that develops proof of concept applications for the USPS innovation team. Chris has documented the frameworks he has developed and his code is used as a reference software implementation for new development. Chris enjoys learning new skills and is always ready to take on new challenges. He is one of the top developers I have worked with in my time at the US Postal Service.

I hope you will consider Chris Lyons for a job as a software developer. I am confident that he can meet any challenge you place before him, and I believe you would be pleased with his work should you choose to hire him. Please feel free to contact me if you have questions or want to discuss his qualifications further. I can be reached at 570-830-5918 or via email at gary.g.parker@usps.gov <<mailto:gary.g.parker@usps.gov>>.

Sincerely,
Gary Parker
Business Project Leader
US Postal Service
